

### Description

These mobile solutions will help you create a controlled acoustic environment that allows you to work from home without compromising the quality of your output. The 8 unit mobile wall producer kit was designed to give you complete freedom and countless layout possibilities that can adapt to different setups.

With this kit, you can treat first reflection points around the listening position whilst isolating a vocal recording with the other, or use the whole kit for a full all-round treatment if you're in the mixing phase. Being a portable solution, you can move and reconfigure the mobile walls as you please. The panels can also be easily mounted to a wall whenever you need.

Artnovion Patent P. ( Acoustic panel with integrated frame system) & Frame design  
Artnovion Patent P. ( Acoustic panel with Tube Fixing System)

### Technical Information

### Features

8 Mobile walls

Structure materials:

- Marine grade plywood
- Inox tube

Panel materials:

- Acoustic fabric
- Marine grade plywood structural frame
- Calibrated cell acoustic foam

Dimensions:

- Structure | 591x285x2085mm
- Panel | 595x595mm
- Mobile | 595x285x2115mm

### Finishes

Structure base:  
(W07) Black
