

dBA Tape

Insulating Wall Bearing

Description

dBA Tape is a cork and recycled polyurethane granulate wall bearing designed to effectively interrupt the transmission of structural and impact noise between wall and floor. As it withstands a significantly high and wide workload range, it is recommended for concrete block or brick wall constructions. dBA Tape is also a very good thermal insulator.

Specifications

Material:
Cork and Recycled Rubber

Dimensions:
10000 x 50 x 5 (mm)

Installation:
Chemical

Technical Information

		Value	Standard
Roll Dimensions [mm]		10000 x 50	-
Thickness [mm]		5	-
Density [kg/m³]		250	ISO 7322
Tensile Strength [kPa]		> 100	ISO 7322
Workload [kg/m]	Min	500	-
	Max	2150	-
