

Fabric Side Cover Kit

Fixing Systems

RESIDENTIAL & Hi Fi
PRO AUDIO & STUDIO
ARCHITECTURE & ENGINEERING

Specifications

The kits come with:

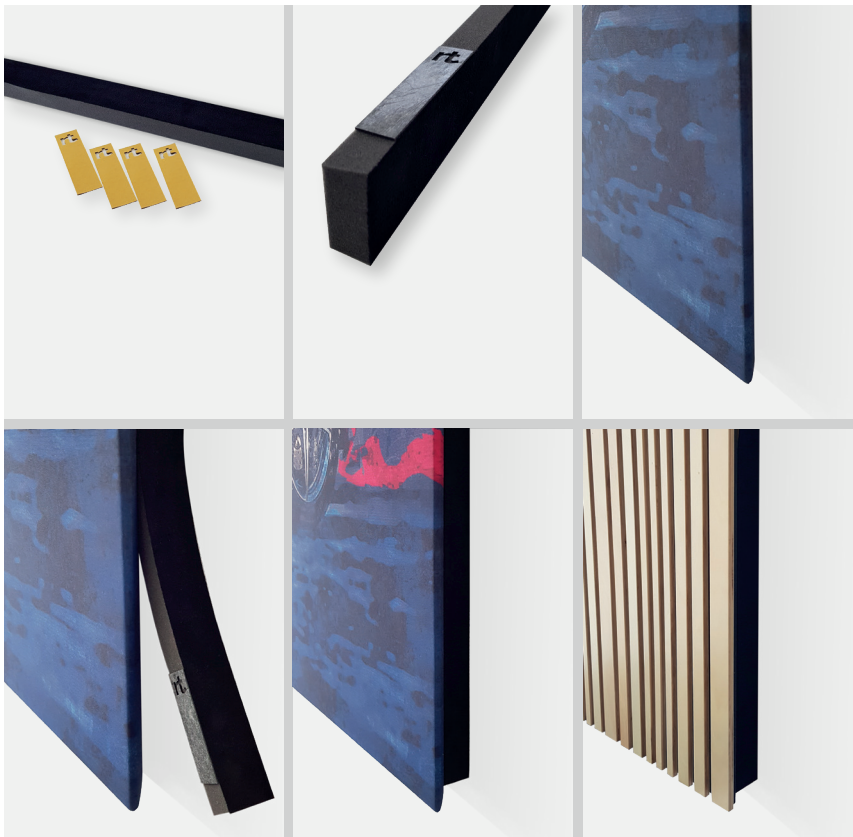

2 units of 1190mm side covers
and 8 double sided adhesive
strips. This is enough to cover 4
vertical sections of a panel array.

or

2 units of 1785mm side covers
and 12 double sided adhesive
strips. This is enough to cover 6
vertical sections of a panel array.

The Fabric Side cover is a simple foam insert, designed to close off the side edges of absorber panels installed with a FixArt systems. It is available in a select of fabric finishes, that match or compliment our standard range of finishes.

It is easily cut to fit smaller arrays and installed with self-adhesive pads, attached to the back of the absorber frame.
